

Digital Transformation Leadership Programme

Digital Transformation Leadership Programme

Duration

Three teaching days

Who is this course for

This programme has been designed for leaders who can shape, influence, develop and implement digital strategies within an organisation.

This course is for you if you want to:

- Develop a digital action plan to implement into your organisation.
- Gain a comprehensive understanding of digital transformation and its impact on business strategies and operations.
- Develop the skills to lead and manage change effectively in the context of digital transformation.
- Identify emerging technologies and trends relevant to the organisation's industry and explore their potential for driving innovation and growth

Overview

Our intense Digital Transformation Leadership Programme is designed to help leaders adapt to the challenges of a fast-paced digital environment. It will equip leaders with the skills and knowledge needed shape influence, develop and implement a digital strategy within your organisation.

For organisations to successfully undergo digital transformation, it is important that the leadership team have the skills and confidence to make the right decisions. Digital transformation and staying relevant in a digital world are the most significant challenges facing organisations today.

Participants will explore and discuss how emerging technology is a catalyst for digital transformation, discussing key themes such Artificial Intelligence (AI) and how businesses can adapt to mitigate risks and maximise opportunities.

The Digital Transformation Leadership Programme will provide the tools, concepts and perspectives required to help you develop strategic responses to new digital opportunities and align your organisation to deliver strategies effectively.

Through attendance on this course, you will become a digitally informed and empowered leader and know how to prepare and help your organisation respond more effectively to technologically driven change. Participants will leave with insights and action plan to implement a digital change within their organisation.

Learning Outcomes

On completion of this programme, delegates will:

- Understand digital disruption and its impact, opportunities and threats, plus emerging themes and current trends
- Foster a digital culture within the organisation that promotes agility, innovation, and continuous learning
- Apply design thinking principles to enhance customer experience and create customer-centric digital solutions
- Understand the importance of digital governance and risk management in ensuring the responsible and secure implementation of digital initiatives
- Enhance leadership capabilities specific to the digital era, such as digital fluency, data-driven decision-making, and managing virtual teams
- Recognise ethical considerations and implications associated with digital transformation and emerging technologies
- Develop a strategic mindset for aligning digital transformation initiatives with organisational goals and driving competitive advantage

Qualification

Whilst this programme is not linked to a formal qualification, it will contribute to the delegate's ongoing personal and professional development.
